

ICT Concepts Lesson Plan Order

I suggest marking up your own charts with each of these concepts as you are watching the videos. You need LOTS of screen time (both live and replay) for this stuff to start making more sense. It's easy to see these things when the entire pattern is already on the page...it's a different story to identify these things as they are forming.

Setting up your own Trading Rules

Here is an example entry rule set from ICT concepts. You don't have to use all the concepts when trading...pick one or two setups that are easiest for you to identify and go with that.
